Qudsaya Suburb, Damascus, Syria

JOP TITLE

Artificial Intelligence Engineer with 1 Year of Experience ,Demonstrates strong critical thinking, decision making, problem solving, time management, multi-tasking, and communication skills

CORE PROFICIENCIES

Machine Learning
Deep Learning
Problem Solving

Back-End Development
flutter Development
HTML & CSS

GitHub
Communication
Mobile Development

Edcation | credentials

Bachelor of Informatics Engineering

Al-Sham Private University, Syria

Specialization: Artificial Intelligence

Expected Graduation: [Your graduation year, if applicable]

- Completed coursework in AI, machine learning, and data science.
- Successfully completed a Deep Learning course, focusing on neural networks, CNNs, and advanced AI techniques

projects

Flight and Hotel Booking Application

Technologies: Flutter, Django

- Developed a cross-platform mobile application using Flutter for booking flights and hotels with a user-friendly interface.
- Implemented the back-end using Django, creating RESTful APIs for user authentication, real-time booking, and database management
- link <https://github.com/Sedraalsabagh/ViaWise>

Emotion Tracking Application

Technologies: Flutter, CNN (Convolutional Neural Networks), Python

- Developed a mobile application using Flutter to track users' emotional states through image analysis.
- Built a CNN model for emotion detection, capable of identifying emotions like happiness, sadness, anger, and more from facial expressions
